Catalyst OrthoScience Announces First Series of Procedures Using World's Only Fully Convertible Stemmed CSR TSA System Featuring an Ellipsoid Humeral Head

Catalyst OrthoScience Inc. (Catalyst), a medical device company focused on the upper extremity orthopedics market, has announced that internationally recognized orthopedic surgeon Theodore Blaine, MD, has completed the first series of total shoulder arthroplasty procedures using the Catalyst Stemmed CSR TSA fully convertible system with an ellipsoid humeral head.

Rice Body Formation: Two JBJS Case Connector Reports

Recent reports in JBJS Case Connector describe 2 orthopaedic cases involving the formation of "rice bodies," fibrinous loose bodies with a rice-like appearance. As discussed by the authors, rice body reactions have been observed within joints, bursae, and tendon sheaths.

Intra-Articular Osteotomy for Correction of Neglected Maluni... : Journal of Orthopedics, Traumatology and Rehabilitation

Hoffa fractures are distal coronal femoral fractures which are intra-articular and involve one or both of the condyles. The lateral condyle is three times more likely to sustain an injury than the medial condyle. Malunion is one of the late complications in neglected instances or following nonoperative management.

Occult Proximal Femoral Fracture With Radiating Leg Pain Masquerading as Sciatica: A Case Report

Occult proximal femoral fractures do not appear as fracture lines in radiographs, causing misdiagnosis and delayed diagnosis unless additional imaging studies, such as computed tomography or magnetic resonance imaging, are performed.

Early Infections Complicating the Care of Combat Casualties from Iraq and Afghanistan

During the conflicts in Iraq and Afghanistan, more than 52,000 U.S. military members were wounded in action. The battlefield mortality rate was lower than in past conflicts, however, those surviving often had complex soft tissue and bone injuries requiring multiple surgeries. This report describes the rates, types, and risks of infections complicating the care of combat casualties.

Surgeons Implant Innovative Device Developed by I3R Researchers to Restore Sense of Touch after Amputation

The first Arkansan and only second person in the world has received an innovative prosthetic hand, developed by researchers at the Institute for Integrative and Innovative Research (I3R), that restores a meaningful sense of touch and grip force following surgery at the University of Arkansas for Medical Sciences (UAMS).

Home Health
coding center
Code faster. Code compliantly.

The leading online resource
for ICD-10-CM coding and
OASIS-E guidance

LEARN MORE

Updated in real-time, *DecisionHealth's Home Health Coding Center* is the proven way to ensure a smooth transition each time the ICD-10 code set, OASIS data set, or the payment system changes with real-time-updates.

LIVE DEMO: Thursday, June 15th, at 1:00 p.m. ET

Attend The Live Demo

How can the Coding Center help you?

"Coding manuals are a thing of the past compared to the Expert Coding Center's abilities. As codes change throughout the year having the Coding Center expert access will ensure that I can locate the correct code or item and get the guidance I need in seconds, all updated in real-time. Having these updates at my fingertips will help ensure accurate coding and OASIS review."

Samantha with Continuum Home Health

What... the Coding Center can do for you

▶ **Ensure Accuracy**

▶ **Ease Regulatory Burdens**

Why... you need Coding Center

▶ Gain access to more than \$2,250 worth of *DecisionHealth's* exclusive, industry-leading coding and OASIS book content integrated into the Coding Center.

▶ The Coding Center is updated in real-time and provides home health-specific tips that help guide you to the proper codes and item responses.

Join our **Home Health Coding Center** demo and let us demonstrate some of the tools this resource can provide you.

Join us **June 15th, at 1:00 p.m. ET**
for the Coding Center Demo!
